ILLUSTRATION ACKNOWLEDGEMENTS

INTRODUCTION	1
<b>PART 1: UNDERSTANDING THE PROBLEM</b>	<b>3</b>
<b>1.1 WHY IS THE DURABILITY OF WOOD VARIABLE</b>	<b>3</b>
1.1.1 Softwoods and hardwoods	3
1.1.2 Tree growth and natural durability	4
1.1.3 Durability and building timbers – a brief history	8
<b>1.2 DECAY AND INSECT DAMAGE</b>	<b>10</b>
1.2.1 What organism has caused the damage?	12
1.2.2 Why is the problem there?	12
1.2.3 How much damage has been caused?	19
1.2.4 Is the decay or infestation current or historical?	21
1.2.5 Will a targeted biocide treatment serve any useful purpose?	23
<b>PART 2: WOOD DESTROYING FUNGI</b>	<b>25</b>
<b>2.1 DECAY FUNGI AND THEIR REQUIREMENTS</b>	<b>25</b>
2.1.1 Types of damage	25
2.1.2 Wet rots, dry rot and mythology	30
<b>2.2 FUNGI THAT CAUSE BROWN ROTS</b>	<b>32</b>
2.2.1 Dry rot ( <i>Serpula lacrymans</i> )	32
2.2.2 Cellar rot ( <i>Coniophora puteana</i> )	40
2.2.3 Mine fungus ( <i>Antrodia vialantii</i> ) and other pore fungi	42

2.3	<b>FUNGI THAT CAUSE WHITE ROT</b>	<b>44</b>
2.3.1	Oak rot ( <i>Donkioporia expansa</i> )	44
2.3.2	<i>Asterostroma cervicolor</i>	47
2.3.3	Ink cap fungus ( <i>Coprinus</i> species)	49
2.4	<b>FUNGI THAT INDICATE DAMP BUT NOT DECAY</b>	<b>50</b>
2.4.1	Cup fungi ( <i>Peziza domicilliana</i> ) and others	50
2.5	<b>THE TREATMENT OF DECAY</b>	<b>52</b>
2.5.1	The changing philosophy of decay treatment	52
2.5.2	Rot treatment in the 21 <sup>st</sup> century	62
	<b>PART 3: WOOD DESTROYING INSECTS</b>	<b>67</b>
3.1	<b>BETLES FROM THE DEAD PARTS OF LIVING TREES</b>	<b>67</b>
3.1.1	Furniture beetle or woodworm ( <i>Anobium punctatum</i> )	67
3.1.2	The changing philosophy of furniture beetle treatment	71
3.1.3	Furniture beetle treatment in the 21 <sup>st</sup> century	76
3.1.4	Deathwatch beetle ( <i>Xestobium rufovillosum</i> )	80
3.1.5	The changing philosophy of deathwatch beetle treatment	87
3.1.6	Deathwatch beetle treatment in the 21 <sup>st</sup> century	90
3.2	<b>SAPWOOD FEEDERS IN FRESHLY SAWN TIMBER</b>	<b>96</b>
3.2.1	House Longhorn beetle ( <i>Hylotrupes bajulus</i> )	96
3.2.2	Powderpost beetle ( <i>Lyctus</i> species)	99
3.2.3	Siricid wood wasps	103

<b>3.3</b>	<b>FEEDERS ON DECAYING TIMBERS</b>	<b>104</b>
<b>3.3.1</b>	<b>Wood – boring weevils</b>	<b>104</b>
<b>3.3.2</b>	<b>Crabronid wood wasps</b>	<b>107</b>
<b>3.4</b>	<b>BARK BEETLES</b>	<b>108</b>
<b>3.4.1</b>	<b>Ambrosia beetles (Pinhole Borers)</b>	<b>108</b>
<b>3.4.2</b>	<b>Scolytid beetles</b>	<b>109</b>
<b>3.5</b>	<b>CHEMICAL DAMAGE</b>	<b>111</b>
	<b>REFERENCES AND BIBLIOGRAPHY</b>	<b>112</b>
	<b>INDEX</b>	<b>114</b>
